COURSE OVERVIEW

This course is designed for students who want to accelerate their career growth by developing a strong understanding of innovation, intrapreneurship, and office dynamics in a corporate environment. Through a combination of theoretical and practical frameworks, case studies, and interactive exercises, students will gain insights into how to navigate the challenges of the modern workplace, create innovative solutions that meet the needs of internal and external stakeholders, and differentiate yourself as a highflyer in a career with an intrapreneurial mindset.

The course will also cover how to cope with mega-trends and transform disruptions into opportunities, as well as the principles and practices of “open innovation”, “design thinking”, “digital and business transformation” concepts with real-life examples. The aim of the course will focus on the applications of theories via techniques, framework and tools which can be useful and practical in students’ work immediately after your graduation, as well as integrating those hard knowledges in innovations and entrepreneurship aspects into career advancement angle with soft skills application. Although not all of the students will start your own companies very soon, but intrapreneurial mindset is the key success factor and differentiator in one’s career development.

COURSE OBJECTIVES:

1. Develop an understanding of open innovation methods and platforms and how to apply them in a corporate environment.
2. Learn design thinking principles to cater to the needs of internal and external stakeholders.
3. Understand how to capitalize and commercialize innovations from a business point of view.
4. Develop a deep understanding of digital and business transformation and how to bolster competitive edge.
5. Learn innovative collaboration and visualization tools with business applications.
6. Learn how to cope with mega-trends and transform disruptions into opportunities.
7. Understand vision and KPI, success and failure factors for various stages of venture development/change management.
8. Learn new ways of communication, team formation, and management during the innovations or business remodeling cycle.

9. Develop an intrapreneurial mindset and learn how to differentiate oneself and be a high-flyer in a career within a corporate environment.

LEARNING OUTCOMES

By the end of the course, the students should attain the following learning outcomes. They should be able to:

- (i) Identify and evaluate innovation opportunities within their organization
- (ii) Apply design thinking methodologies to create customer-centric solutions with cross departmental managerial communication & leadership mindsets & skills
- (iii) Leverage digital and business transformation to bolster competitive advantage
- (iv) Build innovative collaborations and use visualization tools to enhance business outcomes
- (v) Understand how to navigate office dynamics and build effective teams
- (vi) Apply intrapreneurial mindsets & skills to differentiate themselves and advance their careers

COURSE SCHEDULE

The course will be divided into the following modules:

1. Introduction to Intrapreneurship and Innovation

- Understanding the intrapreneurial mindset
- Identifying innovation opportunities within your organization
- Introduction to open innovation methods and platforms

2. Design Thinking for Intrapreneurs

- Customer-centric innovation design with cross departmental collaboration
- Techniques and methods of design thinking
- Utilizing empathy for stakeholder needs and internal communication & alignment skills

3. Capitalizing and Commercializing Innovations

- Turning innovations into a commercial reality
- Business and market feasibility assessment
- Developing and executing a go-to-market strategy

4. Digital and Business Transformation

- How to use digital and business transformation to create value
- Agile methodologies and business transformation techniques
- Understanding competitive advantage in digital and business transformation

5. Innovative Collaboration and Visualization Tools

- Collaborative innovation practices
- Tools to enhance visualization and communication of ideas (Basic technique of using AI tools are included in the teaching)
- Techniques and strategies for effective collaboration and co-creation

6. Intrapreneurial Mindset and Mega Trends

- Intrapreneurial mindset and how to cultivate it
- Analysis of global and industry trends
- Anticipating and adapting to disruptions and opportunities

7. Office Dynamics and Team Management

- Navigating office dynamics and politics
- Techniques for building and communicating with effective teams management
- Leadership strategies in intrapreneurial contexts

8. Differentiating Yourself and Advancing Your Career

- Building a personal brand as an intrapreneurial leader
- Success and failure factors in venture development and change management with people
- Vision and KPI setting for intrapreneurial projects

ASSESSMENT SCHEME

Attendance (1% for each lesson)	10%
Class participation and in class activities	20%
Group Presentation (10 min Presentation + 5 min Q&A) - everyone has to present for at least 1 min Topic: Find a role model leader and analyse his/her key success factors in career development with innovations and intrapreneurship approach	25%
Group Report Presentation PowerPoint + 1 page executive summary	10%
Peer evaluation	10%
Individual Infographics Topic: Your own career framework with innovations & intrapreneurship approach) - AI utilization is welcomed with citation & quotes of usage	25%

ASSESSMENT RUBRICS

Class participation and in class activities:

- Participation Cards will be delivered by instructor during the in-class activities, including lectures, case discussions and guest lecture sharings, students can get the participation card with meaningful questions, logical answers to questions raised and their proactive thorough sharings
- All the participation cards must be returned to TA after filling in the names and SIDs on the same day of delivery, any late submission will not be accepted and will not be counted. Students are fully responsible to keep the card(s) and return to TA by the end of each lesson.
- Each student can get Maximum 4 cards per lesson. Each card represents 0.5% of mark.

Group Presentations

Criteria	Excellent (A, A-)	Good (B+, B, B-)	Average (C+, C, C-)	Fair (D+, D)	Below (F)
Content (50%)	Able to address all the required tasks accurately and logically with creativity	Able to address most of the required tasks accurately and logically with	Able to address some of the required tasks accurately and logically	Able to address a few of the required tasks accurately and logically	Able to address very few of the required tasks accurately and logically

		little creativity			
Team Co-ordination & Q&A session (20%)	Demonstrate a professional team show and manage the Q&A extremely well	Demonstrate a good team show and able to well manage the Q&A	Demonstrate some team co-ordination and manage the Q&A marginally well	Demonstrate a few teams' co-ordination and sometimes not able to manage the Q&A	Not able to demonstrate the team co-ordination and manage the Q&A
Presentation Skills (30%)	Demonstrate the passion, energy & with professional presentation skills and outstanding usage visualizations tools	Present the content very well with eye contact and confidence; fair level presentation skill & good usage of visualization tools	Present the content reasonably well but with less eye contact & confidence; average level presentation skill & usage of visualization tools	Present the content properly but without fair demonstration of presentation skills; fair level presentation skill & little usage of visualization tools	Not able to demonstrate presentation skills properly

Group Reports

Criteria	Excellent (A, A-)	Good (B+, B, B-)	Average (C+, C, C-)	Fair (D+, D)	Below (F)
Content (40%)	Students demonstrate full understanding with elaboration on knowledge and application.	Students report on what is about the topic or the question and are able to bring together the knowledge and application.	Students report on what is about the topic or the company in question with some understanding of the issue.	Students are merely reporting on what is about the topic or the company in question.	Students are not able to report on what is about the topic or the company in question.
Critical Thinking & Analyses (40%)	Students' work asks sophisticated questions about concepts and applications that is crucial to the management discipline. Analyses are organized logically, clearly presented, titled properly, easy to understand by a lay reader, and directly address the questions posed	Students' work address relatively complex questions with some elaboration. Analyses are sufficient and mostly organized. Analyses mostly reflect the questions posed.	Students' work addresses only rudimentary questions. Analyses are sufficient in number but may not be well organized or as clear as they could be. Analyses are on topic but may not perfectly reflect the questions posed.	Students' work barely addresses any question that is crucial to the management discipline. Insufficient analyses/ are included. Analyses do not adequately address the questions posed. Analyses are not well organized or clear.	Students' work is not able to address any question that is crucial to the management discipline. No analyses/ are included. Analyses do not address the questions posed.
Punctuation, spelling, grammar or usage (20%)	Virtually no errors in punctuation or spelling, grammar or usage.	Few errors in punctuation, spelling, grammar or usage.	Errors in punctuation, spelling, grammar or usage are troubling.	Errors in punctuation, spelling, grammar or usage are obvious and frequent.	Not able to elaborate with correct punctuation, spelling, grammar or usage are very obvious and very frequent.

Individual infographics

Criteria	Excellent (A, A-)	Good (B+, B, B-)	Average (C+, C, C-)	Fair (D+, D)	Below (F)
Content (40%)	Able to address all the required tasks accurately and logically with creativity	Able to address most of the required tasks accurately and logically with little creativity	Able to address some of the required tasks accurately and logically	Able to address a few of the required tasks accurately and logically	Able to address very few of the required tasks accurately and logically
Critical Thinking & Analyses (40%)	Students' work asks sophisticated questions about concepts and applications that is crucial to the management discipline. Analyses are organized logically, clearly presented, titled properly, easy to understand by a lay reader, and directly address the questions posed	Students' work address relatively complex questions with some elaboration. Analyses are sufficient and mostly organized. Analyses mostly reflect the questions posed.	Students' work addresses only rudimentary questions. Analyses are sufficient in number but may not be well organized or as clear as they could be. Analyses are on topic but may not perfectly reflect the questions posed.	Students' work barely addresses any question that is crucial to the management discipline. Insufficient analyses/ are included. Analyses do not adequately address the questions posed. Analyses are not well organized or clear.	Students' work is not able to address any question that is crucial to the management discipline. No analyses/ are included. Analyses do not address the questions posed.
Presentation Skills (20%)	The infographics can demonstrate clear, innovative & professional presentation skills and outstanding usage visualizations tools	The infographics can present the content very well fair level presentation skill & good usage of visualization tools	The infographics can present the content reasonably well; average level presentation skill & usage of visualization tools	The infographics can present the content properly; fair level presentation skill & little usage of visualization tools	The infographics was Not able to demonstrate the concepts properly

LATE SUBMISSION OF ASSIGNMENTS

All assignments are expected to be submitted on time. Late submission will not be entertained.

PEER EVALUATIONS

You are required to provide confidential ratings on your group members regarding their contribution to the group project in terms of attendance, cooperation, contribution and being a team player. It is your responsibility to report to the teacher of any free-riding behavior with evidence. The free riders will be penalized as much as zero mark on the group project based upon the peer evaluation & my observation.

GROUP PRESENTATION

Any student who is not able to present the assigned part of final group presentation due to any reason as according to the planned schedule will get zero mark on the group project.

MAKE UP PRESENTATION

In general, make-up presentation will not be provided and a penalty of 30% deduction on the total marks obtained may be applied even if an exceptional case is granted. For the sick leave, student must provide a certificate endorsed by a CUHK doctor.

RECOMMENDED LEARNING RESOURCES

Recommended readings:

- Please refer to course Blackboard, all readings have been uploaded.

GRADE DESCRIPTORS

Grade	Overall course
A	Outstanding performance on all learning outcomes.
A-	Generally outstanding performance on all (or almost all) learning outcomes.
B Range	Substantial performance on all learning outcomes, OR high performance on some learning outcomes which compensates for less satisfactory performance on others, resulting in overall substantial performance.
C Range	Satisfactory performance on the majority of learning outcomes, possibly with a few weaknesses.
D Range	Barely satisfactory performance on a number of learning outcomes
F	Unsatisfactory performance on a number of learning outcomes, OR failure to meet specified assessment requirements.

THE USE OF AI TOOLS

Use only with prior permission

Artificial intelligence (AI) is sweeping the globe, and generative AI in particular has been hotly discussed because of its potential to revolutionize the way we teach and learn. The University believes that it is crucial for teachers and students to embrace and become acquainted with AI in order to optimize its potential in education.

In this courses, it may be appropriate to use AI tools in some in-class exercises, group presentation and the infographic parts of the group report. The use these tools which shall be cited or acknowledged in their work. Details will be spelt out clearly in the instruction of the assignments. Students shall follow the instruction and permission strictly and are expected to understand the limits and appropriate uses of these tools.

Regarding the written part of the group report, students are prohibited from using any AI tools to complete the written part assignments. Students are expected to produce their own work independently without any collaboration or the use of AI tools. The improper and unauthorized use of AI tools to cheat in a course is a serious violation of academic integrity, students not only harm themselves but also the entire academic community. Handing in an AI-generated work as one's own constitutes unauthorized use of AI tools and is an act of academic dishonesty. If the use of AI tools is not permitted on an assignment/assessment, and a student is later found to have used such a tool on the assignment/assessment, the case should be handled in accordance with the University's Procedures for Handling Cases of Academic Dishonesty. Similar to other serious cases of academic dishonesty, penalties for improper/unauthorized use of AI tools in assignments/assessments may include reviewable/permanent demerit(s), failure grade for the course concerned, suspension from the University, lowering the degree classification, and termination of studies at the University.

POLICY ON ACADEMIC HONESTY AND PLAGIARISM

The Chinese University of Hong Kong places very high importance on honesty in academic work submitted by students and adopts a policy of **zero tolerance** on cheating and plagiarism. Any related offence will lead to disciplinary action including termination of studies at the University. Attention is drawn to university policy and regulations on honesty in academic work, and to the disciplinary guidelines and procedures applicable to breaches of such policy and regulations. Details may be found at <http://www.cuhk.edu.hk/policy/academichonesty/>.

With each assignment, students will be required to submit a signed declaration that they are aware of these policies, regulations, guidelines and procedures. In the case of group projects, all students of the same group should be asked to sign the declaration, each of whom is responsible should there be any plagiarized contents in the group project, irrespective of whether he/she has signed the declaration and whether he/she has contributed directly or indirectly to the plagiarized contents.

For assignments in the form of a computer-generated document that is principally text-based and submitted via VeriGuide, the statement, in the form of a receipt, will be issued by the system upon students' uploading of the soft copy of the assignment. Assignments without the properly signed declaration will not be graded by teachers. Only the final version of the assignment should be submitted via VeriGuide.

The submission of a piece of work, or a part of a piece of work, for more than one purpose (e.g., to satisfy the requirements in two different courses) without declaration to this effect shall be regarded as having committed undeclared multiple submission. It is common and acceptable to reuse a turn of phrase or a sentence or two from one's own work; but wholesale reuse is problematic. In any case, agreement from the course teacher(s) concerned should be obtained prior to the submission of the piece of work.

Use of Electronic Devices during Class

A positive learning environment requires active attention, participation and respect for fellow students and the teacher. As such, no electronic devices, including mobile phones, smart phones, tablets, or laptops, are to be used during class unless the professor specifically authorizes their use for a class-related purpose. Violating this policy will result *in a substantial penalty to your class participation grade*.
